

The 5th ACM Workshop on

# Formal Methods in Security Engineering

## From Specifications to Code

held in conjunction with

14th ACM Conference on Computer and Communication Security (ACM CCS'07)

**Program Chairs**

Virgil D. Gligor  
University of Maryland, USA  
Heiko Mantel  
TU Darmstadt, Germany

**Program Committee**

Michael Backes  
Saarland University, Germany  
Gilles Barthe  
INRIA Sophia-Antipolis, France  
Véronique Cortier  
CNRS & LORIA Nancy, France  
Anupam Datta  
CMU, USA  
Amy Felty  
University of Ottawa, Canada  
Andy Gordon  
Microsoft Research Cambridge, UK  
Joshua Guttman  
MITRE, USA  
Peeter Laud  
Tartu University, Estonia  
Fabio Martinelli  
IIT Pisa, Italy  
Cathy Meadows  
NRL, USA  
Jon Millen  
MITRE, USA  
David Naumann  
Stevens Institute of Technology, USA  
Vitaly Shmatikov  
University of Texas at Austin, USA  
Luca Viganò  
University of Verona, Italy

**CALL FOR PAPERS**

Information security has become a crucial concern for the commercial deployment of almost all applications and middleware. Although this is commonly recognized, the incorporation of security requirements in the software development process is not yet well understood. The deployment of security mechanisms is often ad hoc, without a formal security specification or analysis, and practically always without a formal security validation of the final product. Progress is being made, but there remains a wide gap between high-level security models and actual code development.

We aim to bring together researchers and practitioners from both the security and the software engineering communities, from academia and industry, who are working on applying formal methods to the design and validation of large-scale systems.

We seek original research papers addressing foundational issues in formal methods in security engineering. Topics covered include, but are not limited to:

- security requirements and risk analysis
- access control models, information flow models, and trust models
- specification and analysis of security properties
- stepwise development by refinement and composition
- computationally sound abstraction
- program logics and type systems for security
- other techniques for verification and static analysis
- tool support for the development and analysis of security-critical systems
- design and analysis of security protocols
- security aspects of operating systems and middleware
- case studies

All submissions will be peer-reviewed. Authors of accepted papers must guarantee that their paper will be presented at the workshop. Final proceedings will be published by the ACM.

**Submission Guidelines**

Submissions must be received by Sunday June 10, 2007 to be considered. For submitting a paper, follow the guidelines on the FMSE'07 webpage at <http://www.fmis.informatik.tu-darmstadt.de/fmse07/>. Submissions must not substantially overlap with papers that have been published or that are simultaneously submitted to a journal or a conference with proceedings. The article must list all authors and their affiliations. It should begin with a title, a short abstract, and a list of key words, and its introduction should summarize the contributions of the paper at a level appropriate for a non-specialist reader. The submitted paper should be at most 12 pages excluding the bibliography and clearly marked appendices, and at most 15 pages in total, using at least 11-point font, reasonable margins, and page numbers on each page. Committee members are not required to read appendices; the paper should be intelligible without them. The document must be in Acrobat PDF format, and must be legible after printing on standard grayscale printers, both those that use A4 and those that use 8-1/2x11" paper. Submissions not meeting these guidelines risk rejection without consideration of their merits. Camera-ready versions of accepted papers will be limited to 10 pages in total using the ACM conference style.

**Submission deadline**

June 10, 2007

**Notification of acceptance**

July 25, 2007

**Final version (firm)**

August 22, 2007

**Workshop**

Friday November 2, 2007  
at George Mason University, USA
